Description of Works

- Attended site and inspected the reported hydraulic oil leak.
- Identified the damaged hydraulic hose and arranged the required replacement parts.
- Collected and installed the replacement hose and associated components.
- Jump started and operated the machine to verify the repair and check for further hydraulic leaks or issues.
- Performed a general check-over of the machine following repairs.
- Topped up the hydraulic oil level as required.
- Cleaned the affected work area and removed residual oil contamination.
- Completed final operational checks to confirm the machine was functioning correctly and the repair was successful.

The hydraulic hose repair costs were approved by Matt Garraway. Please include these items with the other approved invoice works.
