Recall #: N150817 | SPI Air Bag Inflator Recall Date: 2015 May 28

Recall Description
Inflators subject to Takata equipment recall 15E-041 were installed in certain 2007-2008 model year Chevrolet Silverado and GMC Sierra 2500/3500 Heavy Duty pickup trucks as original equipment. In accordance with Takata's defect determination for these Takata inflators, GM is recalling these vehicles to replace these Takata inflators. The propellant wafers in some of the subject inflators may experience an alteration over time, which could potentially lead to over-aggressive combustion in the event of an air bag deployment. Depending on the circumstances, this potential condition could create excessive internal pressure when the air bag is deployed, which could result in the body of the inflator rupturing upon deployment.

Remedy
Dealers will replace the front passenger air bag inflator, free of charge.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit GM's website. (https://my.gm.ca/gm/en/recalls)
