Recall #: N232431830 | Power-Sliding Rear-Window Defroster Failures Recall Date: 2024 Jun 20

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety may exist in certain 2014-2019 model year Chevrolet Silverado and GMC Sierra vehicles equipped with a power sliding rear window (RPO A48). This recall is related to previous recall N192220470. The involved vehicles were produced or repaired with updated power sliding rear windows that included improved rear defroster circuit design and buss bar covers to address the condition in N192220470, but did not receive the improved contact cover. In these vehicles, areas of high electric resistance on the rear defroster circuit, caused, in part, by mechanical stress from opening and closing the rear power window, intrusion of debris, and use of the rear defroster may, over time, generate heat which could melt the areas surrounding the circuit.

Remedy

Dealers will replace the contact cover, and for certain vehicles, will reprogram the HVAC calibration to disable the rear defroster from automatically turning on after keyed start.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit [GM's website](https://my.gm.ca/gm/en/recalls). (<https://my.gm.ca/gm/en/recalls>)
