CHOPPER PLUGGING

COMPLAINT:

TROUBLESHOOT AND REPAIR CHOPPER PLUGGING
 -CORN DOOR LOOSE ON SHAFT AND LEANING INTO CHOPPER

CORRECTION:

PDM
 chopper plugging due to loose corn/chop doors on handles.
 removed both doors and handle assemblies
 had to remove section of chopper floor to remove rear door
 removed rear door seals and mounting hardware.
 had to cut off handle with torch as it would not come out
 of door
 had to extract the rest of handle out of door.
 while installing handle in rear door I found that the mount
 for the handle inside the door was loose and wouldn't hold
 the handle tight. to fix I had to cut a hole in the door
 and weld handle on the inside so that it wouldn't sit loose
 in the door
 made sure door worked as intended and wasn't loose
 i welded handle on rear door mounts so that they would also
 stay tight on door
 reinstalled seals and all mounting hardware, and
 reinstalled chopper floor
 tested operation of doors after installing new parts and
 modifying handles

everything worked as intended, no issues
