JGEN06- Internal

CORRECTION:

- Approximately 2.0 hours were spent diagnosing the chopper and windrow actuators.
- The separator would not engage because the chopper was stuck in a partially raised position and would not move either up or down.
- Diagnosis was started using Service Advisor.
- All connectors specified by the diagnostic procedure were inspected and found to be in good condition.
- Pin 18 at connector XA41 was not properly locked in place.
- The pin was secured and reinstalled correctly.
- After the repair, all diagnostic codes cleared, system operation returned to normal, and the separator was successfully engaged and tested.

COMPLAINT:

07 Engine Oil and Filter, Change.>

CORRECTION:

1. Remove and replace the oil filter.
2. To remove the oil, open the drain valve.
3. To fill the oil, remove the cap.
4. Check the oil level after filling with dipstick.
5. The oil level should be at the "FULL" mark on the dipstick.

Thursday, July 16, 2026 6:39 AM

- Changed engine oil and Filter. Checked for leaks.

COMPLAINT:

08 Large Multicoupler Hydraulic Quick Coupler Socket, Remove and Replace. This Job Code is for either the Reel Raise/Lower Cartridge, Reel Drive Forward Cartridge, or Reel Drive Reverse Cartridge. >

CORRECTION:

1. Relieve the hydraulic system pressure by fully lowering the header and reel to the ground, then continue to depress the switch for 5 seconds.
2. Use a vacuum pump on the reservoir to avoid draining it. If unavailable, drain the reservoir.
3. Clean all dirt and debris from multicoupler.
4. Remove valve.
5. Clean valve bore of all dirt and oil.
6. Lightly coat valve O-rings and back-up ring with clean oil. Install valve and tighten to specification.
7. Operate hydraulic functions to verify operation and no leakage.

Thursday, July 16, 2026 10:44 AM - replaced the leaking cartridge a new one

1. Fully lower header and reel to ground and continue depressing the switch for 5 to 10 seconds to relieve hydraulic system pressure. Stop engine.
2. To allow removing the pump without draining the reservoir, connect D15032NU Vacuum Pump to reservoir. If vacuum pump is not available, drain reservoir.
3. Remove the left-hand side shields.
4. Disconnect the hydraulic lines.
5. To prevent contamination cap all openings and fittings.
6. Remove socket head cap screws and hydraulic motor from the support arm and coupler.
7. To prevent contamination cap all openings and fittings.
8. Remove cap screws from the hydraulic motor.
9. Repair or replace seals, seal ring, and O-rings as necessary.
10. Install parts in reverse order.
11. Install the reverser hydraulic motor.
12. Repair or replace as necessary.
13. Install parts in reverse order using the following special instruction
14. - Install the hydraulic motor using the socket head cap screws. Tighten socket head cap screws to specific

Friday, July 17, 2026 7:14 AM

- Removed the feeder house reverser motor,
- replaced the seal,
- reconditioned the motor,
- reinstalled it,
- verified proper operation.

TERMS AND CONDITIONS

I hereby authorize the above repair work be done along with the use of necessary materials. You and your employees may operate above machine for purposes of testing, inspection or delivery. I agree to pay cash for such repair parts and labour on delivery of machine(s) or on terms satisfactory to you, and until paid in full, any such unpaid balance shall constitute a lien on this machinery. I further agree that you will not be held responsible for loss or damage to said machinery from fire, theft or other causes beyond your control
