Press vac 803465

To whom it may concern: This is to verify Press vac 803465 has been cleaned and Triple Rinsed of all contaminants from the last contained solids and liquids. The tanker interior was entered (CSE) power washed clean using 3000 PSI hot water pressure washer to rinse the tank clean after the gross contaminants were removed. All piping and hose trays and pump components have been rinsed to the best of our abilities. All waste generated was disposed of per State and Federal regulations. No sampling was requested or performed. Air testing was performed throughout the cleaning process and at completion LEL was "0" O2 was 21.6 VOC "0" CO "0" H2S "0". Areas Addressed: Tank interior and valves.

Respectfully,

Ronald Frommeling
Field Service Branch Manager
Clean Harbors Environmental Services.
