- Removed the EGR cooler elbow, no coolant inside
- Installed the elbow
- Drained the engine oil and coolant
- Engine oil had a short trickle of moisture come out first, then all oil
- Expected the oil pan to be half full of coolant
- The filler neck is coated with water/oil sludge
- Removed the engine oil cooler, took it back to the shop
- Tested it, no leaks
- Installed it
- Filled the cooling system, pressured it up
- No leaks, pressure stayed
- Filled in engine oil
- Ran the unit
- It ran good for a half minute, then the coolant started coming out of the over flow
- Head or gasket issue
- It needs to come in

I hereby authorize the above repair work to be done along with the use of necessary materials. You and your employees may operate the above machine for purposes of testing, inspections, or delivery at my risk. I agree to pay for work completed by your dealer upon completion, satisfactory with you in full express. Mechanic's Lien is acknowledged on the above machine to secure the amount of repairs thereto. It is understood that this company assumes no responsibility for loss or damage by theft or fire to machine placed with them for storage, repair, or while field testing. We request that finished units be picked up within 30 days of completion or the owner will pay reasonable fees associated with the storage of equipment. If equipment is not claimed by the owner within 6 months of notification, the dealer will assume full ownership of the equipment to be recycled/disposed of.
