Open Recalls

Recall #: N192217410 | Reduction in Vacuum Brake Assist Recall Date: 2019 Jun 27

Recall Description

General Motors has approved a safety recall in Canada for certain 2014-2018 model year Chevrolet Silverado LD, GMC Sierra LD, 2015-2017 model year Cadillac Escalade, and 2015-2018 model year Chevrolet Suburban, Chevrolet Tahoe, and GMC Yukon vehicles, that, in some circumstances, may have a condition in which the engine-mounted mechanical vacuum pump output may decrease over time, decreasing the amount of vacuum/power brake assist.

Remedy

Dealers are to reprogram the electronic brake control module (EBCM).

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit GM's website. (https://my.gm.ca/gm/en/recalls)

Recall #: N172085440 | Loss of Steering Assist Recall Date: 2017 Jun 29

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014 model year Chevrolet Silverado LD and GMC Sierra LD vehicles. These vehicles may experience a temporary loss of electric power steering (EPS) assist followed by a sudden return of EPS assist, particularly during low-speed turning maneuvers. The loss and sudden return of EPS assist typically happens within a 1 second period and is caused by an electrical/software issue. If EPS assist is lost and suddenly returned, the driver could lose temporary control of the steering wheel, increasing the risk of a crash.

Remedy

Dealers will perform a reflash of the EPS module software.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit GM's website. (https://my.gm.ca/gm/en/recalls)
