

- Steel Skins

- Pre-coated, galvanized steel skins
- 80,000 psi-yield
- Provides superior damage resistance

- Plastic Core

- High-density polyethylene (HDPE)
- Extremely strong, lightweight and damage resistant
- Flex and absorbs impact
- Will not absorb moisture, resistant to rot and delamination, commonly associated with the use of wood products

- Made in the USA

1. Steel Inner Skin
2. Foamed-Plastic Core Material
3. Steel Outer Skin

-  Polyester Baked-on Paint
-  Rust Inhibiting Baked-on Primer
-  Zinc Coating: G-90 Hot-Dip
-  80,000-psi Yield Full-Hard Steel
-  Proprietary Primer Coating
-  Adhesive Film
-  Foamed-Plastic Core Material
