Recall #: N050037 | SECOND ROW CENTER SAFETY BELT Recall Date: 2005 Jul 14

Recall Description

On certain crew cab pickup trucks and sport utility vehicles, the 2nd row center occupant seat belt routing may make it difficult to position the lap portion of the safety belt low around the hips of occupants, especially smaller occupants, seated in this position. Appropriate use of a child seat or booster seat, as recommended for small children, does improve the fit condition for this user group. In addition to instructions on proper infant and young child restraint (with child seats or boosters), special verbiage for restraining older child is included in the owner's manual. Also, the suggested seat belt fit/routing for adults, irrespective of seating position, is described in the owner's manual text.

Remedy

Dealers will cut open the guide loop, remove a portion of the loop, and then the remaining two sides should be folded over and secured with

a retainer free of charge.

Recall #: N060080 | FUEL RAIL PULSE DAMPER RETAINER CLIP Recall Date: 2006 Aug 23

Recall Description

On certain trucks equipped with an 8.1L V8 engine have a condition in which the engine fuel rail pulse damper retainer clip may fracture resulting in inadequate retention of the damper.

Remedy

Dealers will replace the engine fuel rail pulse damper retainer clip free of charge.

Recall #: N040007 | TAILGATE SUPPORT CABLE Recall Date: 2004 Sep 17

Recall Description

On certain pickup trucks and sport utility vehicles, the galvanized steel tailgate support cables that retain the tailgate in the full open (horizontal) position may corrode, weaken, and eventually fracture. If both cables fractured, the tailgate would suddenly drop and strike the top surface of the rear bumper.

Remedy

Dealers will replace the cables free of charge.
