```
*debris, used the pressure washer to clean it out, tried to
*remove the shifter bracket to get the belt on and found
*that the whole mechanism was seized in the disengaged
*position, broke the bearing lock and managed to get the
*bearing housing off and then applied heat and used a puller
*to get the drive hub off. removed the rust from the inside
*of the hub and cleaned the rust from the splined shaft and
*applied anti seize, the outer bearing was seized and rusted
*so I removed it from the housing and ordered a new one. the
*chopper engage handle was seized and the linkage pin was
*broken, I managed to work the handle free and took it off,
*buffed off the rust and assembled it with anti seize.
*heated the linkage and got the broken pin out and made a
*new pin from a bolt.
*installed a new bearing and assembled the engagement lever
*and checked to make sure it shifts easily.
*hooked up to tractor and ran unit, no vibrations.
*
