☒ I ACCEPT the Extended Warranty

☐ I DECLINE the Extended Warranty

Customer Signature

If declined, I fully understand that any equipment listed above is not covered for customer expenses due to component failures beyond the original basic warranty period provided by John Deere.

Note : This is **not** a contract. For specific Extended Warranty coverage terms and conditions, please refer to the actual Extended Warranty contract for more information and the terms, conditions and limitations of the agreement.

What Extended Warranty is :
The Extended Warranty Program is for the reimbursement on parts and labor for covered components that fail due to faulty material or original workmanship that occur beyond the John Deere Basic Warranty coverage period. The agreement is between Deere & Company and the owners of select John Deere Construction and Forestry equipment, who purchase the Extended Warranty Plans for the desired coverage as indicated in this proposal.

What Extended Warranty is not :
Extended Warranty is not insurance. It also does not cover routine maintainance or high wear items, or insurance-related risks/perils such as collision, overturn, vandalism, wind, fire, hail, etc. It does not cover loss of income during or after an equipment failure. See the actual product-specific Extended Warranty agreement for a complete listing of covered components, and limitations and conditions under the program.

- Features/Benefits:**
- Extended Warranty includes the following features and benefits under the program :
 - Pays for parts and labor costs incurred on failed covered components (less any applicable deductibles),
 - Does not require pre-approval before repairs are made by the authorized John Deere dealership,
 - Payments are reimbursed directly to the dealership with no prepayment required by the contract holder.

A handwritten signature, likely 'JRE', is enclosed within a blue rectangular box. Above the box, the word 'JRE' is printed in a small, black, sans-serif font.

Notice: When operated in California, any off-road diesel vehicle may be subject to the California Air Resources Board In-Use Off-road Diesel Vehicle Regulation. It therefore could be subject to retrofit or accelerated turnover requirements to reduce emissions of air pollutants.
