Recall #: N192264501 | CMVSS 208 Occupant Crash Protection – Canada Only Recall Date: 2019 Sep 06

Recall Description

General Motors has decided that certain 2019 model year Chevrolet Express and GMC Savana vehicles may fail to conform to S7.3 of Technical Standards Document (TSD) No. 208 of Canada Motor Vehicle Safety Standard (CMVSS) 208, Occupant Crash Protection. In these vehicles, the seatbelt-unfastened telltale and the airbag- readiness indicator will not illuminate for approximately five seconds after the ignition is moved to the on or start position. There is no impact to the vehicle's seatbelt or airbag systems, and the telltales will function normally after the five-second delay. During the five-second delay, the telltale will not alert the driver that the driver's seatbelt is unbuckled or complete the airbag indicator readiness bulb check. There is no delay in the activation of seat belt warning chimes.

Remedy

Dealers will reprogram the instrument panel cluster (IPC).
