Pinion Seals front

### CUSTO COMPLAINT

Pinion Seals front

### CAUSE:

front seal was leaking

### CORRECTION:

removed driveline, removed seal and yoke, measured play on shaft and there too much play, removed power divider, disassembled and found the bearing had pitting and there was no brass thrust washer between oil pump and gear. spider gear had excessive play as well. ordering parts to replace if customer approves. talked to customer and decided to install new wear washer and put unit back together, replace 2 o rings on inner seal. reinstalled power divider, reshimmed it and was able to get within spec on input shaft. installed new input seal and installed yoke, filled with oil and needed 4 liters for top up. took for test drive to confirm everything was good, inspected for leaks, double checked diff level.
