REMOVE FUEL TANK FLUSH OUT

### CORRECTION:

Started pulling back of combine apart then Myles came and helped. Pulled back panels, ladder, braces and straps off fuel tank. Thought we could pull fuel tank out the back but we couldn't, had to pull the floor. Got all 60 bolts out of the floor. Floor was pinched by air box housing. Tried to pry it out but had no luck. Used ratchet strap and pulled it out then removed fuel tank. Blew it off, removed fuel sender, flushed tank out, let it dry over night then reinstalled. Put fuel through scrubber and put it into tank. Installed fuel sender with new seal. Replaced all bolts, then reinstalled back covers. Test drove around yard. No issues. \*Note: Found blockage in supply line. In clear bag attached.
