CUSTO COMPLAINT

Hydro Issues

CAUSE:

..

CORRECTION:

the sprayer would drive and then stop  
 the hydros were fighting each other  
 ran 2 sets of gauges from the back of the sprayer to the  
 cab to test my high pressure relief  
 un plugged the brake pedal and tested it  
 tested the charge pressure  
 the right side pump was low  
 I spent a lot of time trying to get it adjusted corectly  
 finally got them both set to the correct pressure  
 then figured out what ports i needed to install dr fittings  
 and rest from  
 got 2 more hoses made up so we could watch all the  
 pressures  
 tested a few different ways on each pump and it was reading  
 all over the place  
 then I by passes the sunt valve and for some reason it  
 worked for a bit

then I replaces the spool in the sunt valve and if messed up again then me and lyle were driving it again and he hopped out and stated wiggling the wires going into the electronic control valve and it would stop and start thats why sonetimes it would work becuse i was bumping the wires when working on shunt valve or the other fittings so I ordered one hooked the vacuum up to the hydraulic oil tank and then removed the valve and replaced it put it all back together to how it was supposed to be topped it up with oil and took it for a test drive checked for leaks and everything worked as it should
