Recall #: Y26 | 2012-21 D Truck M14 Wheel Studs Recall Date: 2021 Jun 08

Recall Description

Torque specification information included in vehicle Service and Owner's Manuals may cause flanged lug nuts to be torqued to a level that may cause the wheel stud to yield and eventually break during vehicle operation.

Remedy

FCA US will conduct a voluntary safety recall on all affected vehicles. For vehicles in Y26 and Y60, FCA US will inspect the wheel studs and update the torque specification in owner's information and published service documents. Vehicles found with studs that are potentially yielded will have a new stud installed and the lug nuts tightened to the updated torque specification. For vehicles in Y36, FCA US will update the torque specification in owner's information and published service documents
