Replace engine oil/filter
CORRECTION: _____
August 31/ 2021
Ran engine to warm the oil. Drain valve broke when tried to open it. Removed reinforcement panel under the engine (had to cut one of the bolts off) and then removed floor panel below the engine. Removed drain hose; unthreaded drain valve to drain the engine oil.
September 1/ 2021
Changed engine oil filter and refilled the crankcase. Vacuumed debris from around the edges where the floor panel bolts in. Straightened floor panel, drilled holes out for the reinforcing plate so bolts would fit properly and welded bolts into place to make installing the plate easier. Secured the floor panel into place followed by bolting the second plate in.
Ran engine to fill the filter and topped up the oil level.
ADDITIONAL DESCRIPTION: _____
