Electrical issues

COMPLAINT: _____

No ISO bus connection

won't read small feed box in front

doesn't fold up, goes to 90%

CAUSE: _____

electrical ends

sensors

software

CORRECTION: _____

-Drove around and check all functions to see what the issues were

-Rollers for small tank would not run

-went through all settings on ISO side and 700 side

-checked power and ground getting to clutches, found connectors for clutches were rotten and falling apart; not making good connection

-cut off old connectors and installed new weather pack connectors

-ran and checked; right side would now turn but left side would not

-talked with Trent from salford

-Tested power and grounds at speed sensors for small

rollers

- Salford recommended updating software on the valmar
- got software downloaded onto a usb stick and installed software into valmar
- went through all settings with Trent but still could not get machine to operate
- hooked multi meter to speed sensor and watched it as I spun the rollers, found left side was not picking up the speed
- adjusted angle of bracket and reshimmmed the sensor with washers
- sensor is now picking up the roller spinning and reading speed
- ran and checked; small rollers now stay running
- fan speed was intermittently reading, tested power and ground
- removed and replaced fan speed sensor, ran and checked
- now fan speed is reading as it should
- looked into ground speed issue, was always reading a ground speed even when not moving
- checked all settings, backed up another tractor to valmar and plugged in, speed worked fine on other tractor so we know it is an issue with tractor side
- updated Pro 700 in tractor, set up monitor but speed was still having issues
- submitted assist, unplugged radar to see if it was shorting out and causing issues but it was not
- updated all other controllers on tractor and speed issue is now fixed
- drove around and checked all functions of spreader

-left side chain was skipping, checked all bearings, found that the chain was hitting the top hat in the tank because it was bent, loosened off top and straightened out
-looked at folding issue, left side boom would not come in all the way
-adjusted linkage on left side to make it the same as the right side and now it folds good
-ran all functions one more time and all is working at this time
