PRODUCT SPOTLIGHT

ATRO PARTS

ENGINEERED | DURABLE | RELIABLE
MANUFACTURED IN ST. CLAIR, MISSOURI | U.S.A.

VOLVO T-RIDE® SUSPENSION

The Volvo T-Ride® suspension is for both on- and off-highway applications. It features a parabolic tapered spring pack that is upside-down and mounted outside the frame rails. There is a cushion that sits on each axle that is bolted to the end of each spring to absorb shock and vibration. Four lower torque rods control braking and acceleration forces. These suspensions are popular on waste haulers.

BENEFITS OF ATRO COMPONENTS

ATRO's T-Ride® components are chemically resistant to the common contaminants that most fleets face.

All T-Ride® torque rods and V-rod bushings have rotating pins for easier installation & elimination of torsional stress.

Load Spring:

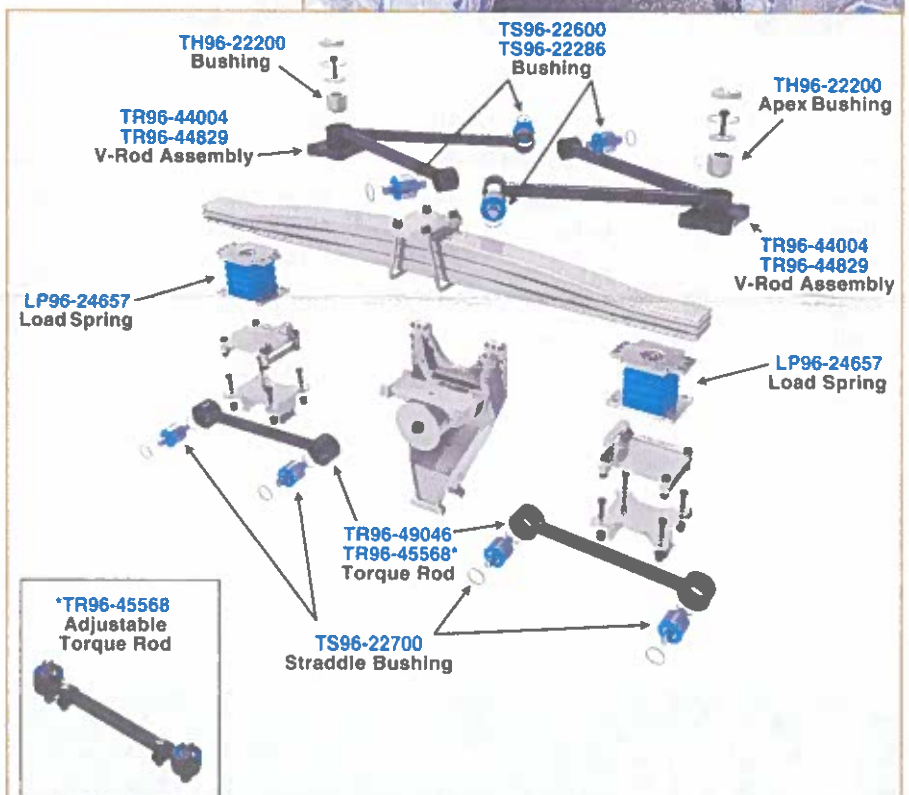

- Proprietary polyurethane formulated to absorb shock & dampen vibration improving ride quality

Lower Torque Rods:

- Complete fixed length & adjustable torque rods, all with rotating pins for easier installation
- OE lower torque rods rebushes with rotating TS96-22700 bushing for easier installation

Upper V-Rods:

- TH96-22200 apex bushing uses a low friction, high abrasion & wear resistant polyurethane for durability & longevity
- TS96-22600 & TS96-22286 end bushings have a split outer sleeve to ease installation & conform to inconsistent eye sizes
