			HOOK UP TO TRUCK WITH COMPUTER AND SCAN CODES MILEAGE: 708894 KM		
			GST		
			HAD LAPTOP HOOKED UP TO TRUCK AND HAD A DERATE CODE. DID A SOLENOID CLICK TEST FOR THE 2 FUEL PLUNGERS INN ACCUMULATOR HEAD. THE FRONT ONE NEVER CLICKED. REMOVED WIRING AND INSTALLED FRONT WIRES INTO REAR SOLENOID AND REAR ONE CLICKED WHILE TESTING THE FRONT. THIS VERIFIES THE WIRING IS GOOD AND ACCUMLATOR HEAD NEEDS REPLACED.		
			REMOVE FUEL LINES TO ACCUMULATOR HEAD OF FUEL PUMP. REMOVE BOLTS FOR SUPPORT BRACKETS INTO ACCUMULATOR. UNDO NECESSARY ELECTRICAL PLUGS. BEGAN UNBOLT 4 BOLTS THAT HOLD ACCUMULATOR ON. THE TOP 2 GOT STIFF RIGHT AWAY. TRIED WORKING THEM IN AND OUT BUT NEVER HELPED THEM COME OUT EASIER. HAD TO JUST MUSCLE		
			THEM OUT ALL THE WAY. BOTH THOSE BOLTS HAD GULLED UP ALUMINUM ON THE BOTTOM COUPLE THREADS WHICH RUINED THE THREADS ALL THE WAY OUT. CLEANED UP AROUND PLUNGERS AND COVERED WITH RAG. DRILLED OUT THE TOP 2 HOLES. TAPPED THE 2 HOLES AND INSTALL HELI-COILS. CLEANED UP BOLTS AND TEST FIT THEM AND MAKE SURE THEY THREAD IN ALL THE WAY. INSTALL NEW ACCUMULATOR HEAD. BOLTS DOWN AND TORQUE TO SPEC. INSTALL BRACKET BOLTS AND ELECTRICAL CONNECTORS. INSTALL FUEL LINES. CRANK TRUCK OVER AND LET RUN. ENGINE LIGHT STAYED OFF WHILE RUNNING. TOOK FOR TEST DRIVE AND HAD GOOD POWER. CHECK OVER FOR LEAKS. ALL GOOD
