Diagnose and repair RTK radio

CONDITION:

\*

Diagnose and repair RTK not working.

\*

CAUSE:

\*

Electrical noise/interference in connector.

\*

CORRECTION:

\*

Test operation, machine only connecting to RTK-X.

attempt to connect to RTK, but unable to connect to a RTK radio.

remove radio and test that the radio is receiving 12v and good ground, all ok.

test can high and low to connector, all ok.

update to the latest software.

swap receiver and radio with known working and fault has not changed.

test harness from ssu to receiver connector, power supply, ground and can test okay.

load test all wires and all test okay.

swap passive and active terminators with known good, faults remains the same.

v-net advised to try and remove all unnecessary wires from the receiver connector only leaving power, ground and can.

test operation and RTK now working correctly, fault was

Diagnose and repair wheel angle fault codes.

\*

CAUSE:

failed harness

CORRECTION:

test operation.

active code for wheel movement detected when no flow on flow meter.

disconnect the harness from the sensor and from the connector at the ssu.

test the harness.

found high resistance on the harness.

disconnect harness at connector at flow meter in-between sensor and controller.

test again and isolated fault between sensor and connector at flow meter.

found a previous repair which is the cause.

replace complete harness.

calibrate the wheel angle sensor.

test operation and all okay.
