This vehicle history report is based on information (https://www.carfax.ca/vehicle-history-data) that was reported and available to CARFAX Canada as of January 24, 2025 (or once all the data was collected from our data sources and the report was complete). CARFAX Canada draws on billions of data records from thousands of sources across North America, and we receive new historical data records every day. There may be other information about this vehicle that has not been reported to CARFAX Canada. When buying a used vehicle, we always recommend using a CARFAX Canada Vehicle History Report, along with a vehicle inspection and test drive, to make an informed decision.

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2019 – 2020 model-year Chevrolet Silverado and GMC Sierra 1500 vehicles and in certain 2020 model-year Chevrolet Silverado and GMC Sierra 2500/3500 vehicles built with carpet floor covering (RPO B30). In certain crashes that cause the front seatbelt pretensioners to deploy, the exhaust from the deployed pretensioner may be diverted through an opening in the pretensioner bracket and ignite cotton fibers in the carpet floor near the B-pillar. Following a crash that causes the seatbelt pretensioner to deploy, a fire may develop in the area near the B-pillar, which may increase the risk of injury.

Dealers will install a feature that will close off the opening in the pretensioner bracket so that exhaust gasses vent away from carpet material as designed.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact GMC or visit GM's website. (https://my.gm.ca/gm/en/recalls)
