Re.

Equipment information: Clark Forklift

Engine Manufacturer: Cummins	Owner:
Engine Model: V-555	Contact:
Engine Year: 1983	Phone:
Engine S/N: MV-4034	Email:
Engine Output: 270 HP	
VIN: UNK	
Machine Model: C500Y300	
NRDE Classification: Tier 0	

This letter is to advise that CDTi has, in the past, and is willing to continue to, supply our on highway verified DOC into off-road applications. We have applied the AZC to both on and off-road engines with similar success rates and PM emission reduction rates.

We acknowledge that the off-road applications can be more strenuous and requires a more robust and complicated installation, however, we size the product appropriate to the off-road engine and would expect every chance of success with a well-maintained engine.

Based on the pre-assessment conducted by DES Vancouver, an authorized CDTi installer, CDTi hereby confirms that the AZ DOC or Purimuffler will reduce total PM by a minimum of 26% from current values for the above referenced engine.

Sincerely,

CDTi

Dan Lyon
Director of System Sales
