kicked unit out side and let it run to make sure no more def codes come up
 LM-03/13/26- SCR code came back up. hooked up est and had a code for SCR fault under high pressure, ran a udst test to test system under high pressure and everything worked good. cleared code but the fault wouldn't go away on A post, opened up easy tool and it said there was 2 active codes but couldn't identify them. went back into est and ran a SCR repair verification test which took some time had to get the exhaust gas temp up to 464 F. after going through the test it said complete and everything looked good. code went away after test and there was no codes in est or easy tool.
 -03/16/2026- checked again and code came back, drained DEF disconnected battery cables from batteries then removed battery box and frame that goes around def tank above the fender. removed 12v/24v kill switch and fuse control panel and tied it up out of the way. marked and removed inlet/outlet and backflow DEF lines then removed coolant lines from sender and dosing module.
 covered hoses in plastic and tied them out of the way.
 removed retaining bar for tank.
 removed DEF lines and hoses from tank, loosened hose clamp on bottom DEF line then pryed tank up and pulled it out enough to get at the sender. pulled old sender out of tank and put on bench, opened new sender and realized it was the wrong one, ordered new sender. cleaned up tools.
 got the different sender in and installed into tank making sure it fit, hooked up def and coolant lines and plugged in wiring harness. pushed DEF tank back in place and hooked up

 REPLACE LH HOOD SHOCK

CONTINUED ON PAGE 08

I hereby authorize the above repair work to be completed, including any necessary materials, labour, and/or other charges as may be applicable. Young's Equipment Inc., its employees, and assigns may operate the above-noted vehicle, as well as other equipment that may be necessary to operate said vehicle, for the purposes of testing, diagnosing, inspecting, repairing, and/or delivering at my risk. Young's Equipment Inc. is not responsible for any loss of and/or damage to the equipment, or its contents, whether due to collision, fire, theft, or any other cause, except where such loss and/or damage is due to negligence on the part of Young's Equipment Inc. Young's Equipment Inc. is hereby released from any and all claims for loss and/or damage not caused by the negligence of Young's Equipment Inc.
 • It is the customer's responsibility to ensure that a level of insurance, including physical damage insurance, that is acceptable to that customer is in place at all times while Young's Equipment Inc. is working on, and/or in possession of the above-noted equipment.
 • Young's Equipment Inc. does not assume any responsibility whatsoever for equipment left for repairs, storage, or other purposes, nor for articles left in vehicles. Vehicles driven by Young's Equipment Inc.'s employees at own risk.
 • An express mechanic's lien is acknowledged on the above noted equipment to secure the amount of repairs thereto. Terms are cash on receipt of invoice. Interest will be charged at the rate of 2% per month (24% per annum). Young's Equipment Inc. reserves the right, at its sole discretion, to refuse the release and/or delivery of equipment until such a point as invoices have been paid.
 • Estimates are for the items specifically identified in the estimate only, and are non-binding.
 • Young's Equipment Inc. and any other manufacturers do not provide warranty, neither expressed nor implied, on any repair performed on equipment that has been modified.

RESEAL BOGIE A7

CORRECTION:

LM-put block behind front left track and backed up until the track was up on the block. released tension on track seemed like it was a bit siezed up and wouldnt loosen enough to get bogie off, had to used a come along and suck the idlers together. drained oil from bogie, removed cap and bolt then pulled bogie off. washed dirt out of bogie and cleaned it all up. hammered bearing races out of bogie wheel. used a puller and pulled old seal cup off shaft. used tool and installed new seal cup, and new bearing races into bogie wheel. buffed and cleaned seal surface in bogie then used tool and pressed seal into bogie and into cup on shaft. cleaned again with alcohol then installed bogie onto shaft, put some oil on bolt and torqued it to 350ft-lbs. made sure it spun good then reinstalled cap and snap ring, pressure tested with air to make sure nothing leaks out. filled with sae 30 motor oil. put shop tools away, cleaned up my tools.
