Open Recalls

Recall Description

The retractors for the front driver and passenger seat belts are mounted in the access door (rear door) panels of the vehicle. Due to insufficient strength of the access door panel, cracks may develop in the panel if the access door is repeatedly and forcefully closed over an extended period of time. If cracks develop in the panel around the lower retractor anchor, the seat belt retractor could become detached, increasing the risk of serious injury to an occupant in the event of a crash.

Remedy

Any Toyota dealer will inspect the rear door panels for cracks or separation and perform one of the following repairs on affected vehicles: 1) if no cracks in the panel around the upper retractor anchor are identified, Toyota will install an access door panel reinforcement plate;2) if cracks in the panel around the upper retractor anchor are identified, Toyota will install an access door panel reinforcement plate and the seat outer belt assembly will be replaced;3) if separation of the lower retractor anchor is identified, the door panel and the seat outer belt assembly will be replaced.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact TOYOTA or visit [Toyota's website](https://www.toyota.ca/toyota/en/owners/recalls). (https://www.toyota.ca/toyota/en/owners/recalls)
