

Warranty Clauses for Steel Structure Components

Scope of Warranty: This warranty covers all steel structural components of the project (including steel columns, beams, and connectors), excluding issues such as deformation, cracking, corrosion, or loose connections resulting from construction quality defects.

Warranty period: 10 years from the date of sale.

Warranty Liability: During the warranty period, the manufacturer shall provide free repairs for defective components and cover all material and labor costs.

Exemption Clause: Damages caused by force majeure, improper use by the owner (overloading, unauthorized modification), or third-party construction are not covered under this warranty.

Other: Matters not covered herein shall be governed by applicable national laws and regulations as well as the terms of this contract.
