Recall #: N010030 | STEERING LINKAGE BEARING BALL SOCKET Recall Date: 2001 Apr 17

### Recall Description

Some of these vehicles have a condition in which the bearing ball sockets in the tie rods and/or the relay rod may not have been manufactured to the print specification for case depth and hardness, resulting in the potential for premature wear-out and eventual joint separation. As the joint wears, the driver may notice a loose, on-center steering feel. If the vehicle continued to be operated in this condition, a tie rod or relay rod joint could separate from the socket.

### Remedy

Dealers will replace the ball socket assemblies free of charge.
