Recall #: N242487090 | Tailgate May Open Unexpectedly Recall Date: 2025 Jul 08

Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2023 – 2024 model year Chevrolet Silverado and GMC Sierra Light Duty (1500 series) vehicles built between August 2, 2023 and March 8, 2024, located in Canada, and equipped with power-unlatching tailgates. Under certain conditions, water may intrude into these vehicles' tailgates and come into contact with the electronic gate-release switch, potentially causing a short circuit. The tailgate may inadvertently unlatch while the vehicle is in Park. This is an expansion of GM Recall N232426400 (TC 2024-061). Under certain circumstances the tailgate design permits water to intrude into the gate, which in combination with an unsealed switch can result in a short circuit. Customers may notice the tailgate has inadvertently opened. If the driver does not manually close the gate before beginning a drive, cargo in the bed of the truck may exit the vehicle and become a road hazard, increasing the risk of a crash. Until the recall is completed, owners should check that the tailgate closed and latched before driving.

Remedy

Dealers will replace the exterior touchpad switch assemblies.
