Structural Inspection Certificate

Manufacturer	SS Rig & Equipment
Model Number	S4-50
Serial Number	12-0098
Unit Number	34
Odometer Reading	476,236 km
Reference Number	22-SR1339-1
Date of Inspection	March 29, 2022
Certification Due Date	March 29, 2023

Good for 24,000 hrs
(6 years - see inspection instructions)

Visual and magnetic particle inspections were performed on the above-described 50,000 lb capacity wireless mast unit, owned by Southern Pressure Testers Ltd.

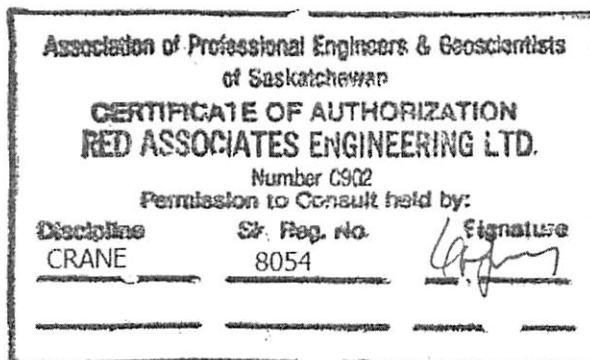

This mast unit was non-destructively inspected, and where required, repaired and then re-examined. The specific components inspected were as follows:

1. Stabilizers
2. Carrier Frame
3. Upper Structure
4. Winch Connections
5. Mast Section
6. Load Line
7. Auxiliary Load Line

This structural inspection was performed on the equipment in the assembled condition. This certification is contingent on all previous structural repairs or modifications being performed in accordance with the original equipment manufacturers specifications or certification by a professional engineer.

Based on the results of the inspection, this equipment is considered to be safe for use. In addition to this structural inspection, all applicable original equipment manufacturers specifications, CSA codes and OH&S regulations are to be followed. Any incident, deviation of normal operation or unauthorized structural repairs subsequent to this inspection will void the certification.

EQUIPMENT CERTIFICATION

CUSTOMER:	S.S Rig & Vac
CUSTOMER EQUIPMENT #:	N/A
CUSTOMER RIG #:	N/A
EQUIPMENT DESCRIPTION:	Alco Travelling Block
MODEL AND RATING: <u>25 Tons</u>	16" For 3/4" Line - 25 Ton (22241-daN)
INSPECTION COMPANY / REPORT #:	Alco / H -28718
ALCO ENGINEERING FILE #:	72484-E
ALCO WORK ORDER #:	72484

This document certifies that all parts and/or assemblies for the equipment listed above, have undergone a Level IV inspection and repair as per Canadian Association of Oilwell Drilling Contractors (CAODC) R.P. 4.0.

All Engineering, material acceptance, repairs, modifications, dimensional inspections, proof test and non-destructive testing (NDT) were performed, or approved by Alco Inc. qualified personnel.

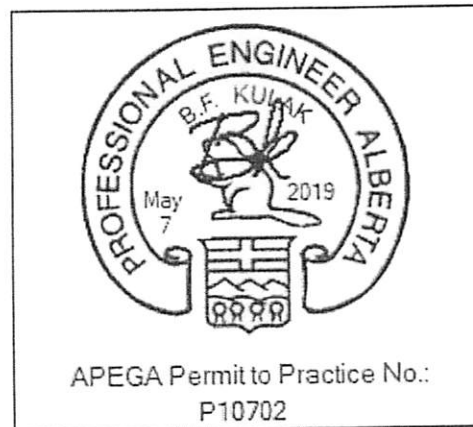

The equipment may be returned to service at the referenced equipment rating.

This certification is valid for a period of 6 years from the date indicated on the Engineer's stamp shown below, or until such time that the equipment has been damaged either as a result of operation, transportation or handling.
