Overall examination comments
Unit# 103..

**Certificate issued by:** Accu-Flo Meter Service Ltd., (A0105),  
A01050002 - Steve Cleary  
4028 - 7th Street S.E., Calgary, Alberta, T2G 2Y8  
403-243-1425

It is the responsibility of the trader to ensure their device is measuring accurately when it is used for trade transactions.

Traders operating in eight industry sectors (retail petroleum, retail food, grain and field crops, forestry, downstream petroleum, fishing, dairy, mining) are required to have their devices examined on or before the next examination due date specified on this certificate.

If a device fails an examination (i.e. with an examination result of seized, rejected - error against consumer or warning - error against trader), the certificate may specify a next examination due date by which the device is required to be re-examined and certified to again meet legislative requirements. It is an offence under the Weights and Measures Act to use a device after the next examination due date has expired.

For more information and a list of authorized service providers who can perform examinations, please visit <https://ised-isde.canada.ca/app/mc/asp/srch/aspSearch.html?lang=eng> or contact your nearest Measurement Canada office.
