listed in the inspection report are covered under this
certification

This structural certification is issued on the basis of the inspection performed according to the applicable standards and specifications and does not imply a review of the equipment's design or capacity. The inspection involved visual examinations and non-destructive methods to assess the condition of the equipment, specifically focusing on accessible areas at the time of inspection. All observations have been recorded in the inspection report. Based on the findings of this inspection, the equipment is deemed safe for use under the conditions observed. Any unauthorized repairs or modifications made to the equipment will void this certification. Continued compliance with safety and maintenance standards is the responsibility of the equipment owner/operator. Regular inspections and maintenance following manufacturer recommendations and industry standards are strongly advised.
