Nortech Field Report #'s	353222
Our Engineering File #	NT-7268
Permits to Practice: BC 1005175, AB P10646, SK 38390, MB 6938, ON 100622257, NT P1648	

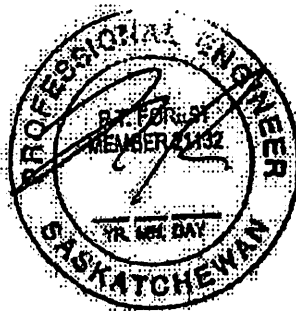

We performed an annual structural inspection of this bucket truck as indicated on the inspection reports listed above. Nortech provided visual and magnetic particle inspection services. The field reports listed above provide a summary of the inspections.

As a result of our inspections and review, it is our opinion that the structural components of this bucket truck are in safe operating condition and may safely resume service according to all original specifications.

This certification is valid for 1 year. In addition to this inspection all applicable specifications from the original manufacturer and all applicable CSA codes and OH&S regulations are to be followed. Any incident, deviation from normal operation, or unauthorized repairs subsequent to this inspection will void this certification.
