Brought the unit into the shop and began going over the unit as per CVIP inspection list preparing a list of repairs needed to pass inspection. Prepared a quote for the customer for approval – once approved, ordered and picked up parts and began repairs.

Jacked up #3 and #2 Axle and removed wheels. Removed 3R hub and wheel seal. Removed and replaced 2R, 3R and 3L wheel seals and removed and replaced both #2 axle brake chambers.

All 40 lugs were seized onto the unit and required care and time to remove. During the process 4 wheel studs were changed out due to the threads being peeled. All lugs were replaced.
