Cust Unit: DLR Unit No.: EQ0041149 Model Year: Make: Volvo Construction Model: EC300EL S/N: VCEC300EH00312653

METER IN: 13415.00 METER OUT: 13415.00

SEGMENT : 1 REGEN FAILURE
SEGMENT TYPE : Chargeable

CORRECTION :

tech went out to machine. tech checked and found multiple error codes for Aftertreatment system and for engine cooling fan. tech checked and found that the harness for aftertreatment, ecu's and fan has been repaired using overlay wires with scotch locks. tech found that the fan clutch has damaged wiring at the clutch that has been repaired with unsealed butt connectors and now has corrosion inside the wiring and clutch. tech ordered the harness and clutch.

tech went out to machine. tech installed the new harness and the new fan clutch. tech ran machine but the engine temp would not stay above 145f. tech ordered a thermostat.

tech installed the new thermostat and ran machine to confirm repair. machine is working correctly now.
