

Asset Name	Date	Plant Hours	Engine Oil Filter Replaced
S987 - Loader Komatsu WA500	1/05/2025	14794	No - not required in accordance with manufacturers servicing guidelines
S987 - Loader Komatsu WA500	21/07/2025	14983	Yes
S987 - Loader Komatsu WA500	2/12/2025	15158	No - not required in accordance with manufacturers servicing guidelines
S987 - Loader Komatsu WA500	13/02/2026	15250	No - not required in accordance with manufacturers servicing guidelines
S987 - Loader Komatsu WA500	13/04/2026	15376	No - not required in accordance with manufacturers servicing guidelines

Engine Oil Replaced
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Yes
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines

Hydraulic Oil Filter Replaced
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines

Hydraulic Oil Replaced
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines
Levels Checked - replacement not required in accordance with manufacturers servicing guidelines

Transmission Oil Filter Replaced
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines

Transmission Oil Replaced and levels checked
Checked Levels - Oil change not required in accordance with manufacturers guidelines
Checked Levels - Oil change not required in accordance with manufacturers guidelines
Checked Levels - Oil change not required in accordance with manufacturers guidelines
Checked Levels - Oil change not required in accordance with manufacturers guidelines
Checked Levels - Oil change not required in accordance with manufacturers guidelines

Fuel Filter Replaced
No - not required in accordance with manufacturers servicing guidelines
Yes
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines
No - not required in accordance with manufacturers servicing guidelines

Coolant level checked and replaced	Radiator and Lines checked
Checked Levels - Coolant change not required in accordance with manufacturers guidelines.	Yes
Checked Levels - Coolant change not required in accordance with manufacturers guidelines.	Yes
Checked Levels - Coolant change not required in accordance with manufacturers guidelines.	Yes
Checked Levels - Coolant change not required in accordance with manufacturers guidelines.	Yes
Checked Levels - Coolant change not required in accordance with manufacturers guidelines.	Yes

Brakes checked and drums, discs, slack adjusters and pads replaced as required
Brakes checked and all in good working order
Brakes checked and all in good working order
Brakes checked and all in good working order
Brakes checked and all in good working order
Brakes checked and all in good working order

Confirmation of tyre inspection	Hydraulic Inspection
Tyres inspected and suitable for use. Inflated to correct pressure. No damage to sidewalls	Rams and hoses inspected no damage.
Tyres inspected and suitable for use. Inflated to correct pressure. No damage to sidewalls	Rams and hoses inspected no damage.
Tyres inspected and suitable for use. Inflated to correct pressure. No damage to sidewalls	Rams and hoses inspected no damage.
Tyres inspected and suitable for use. Inflated to correct pressure. No damage to sidewalls	Rams and hoses inspected no damage.
Tyres inspected and suitable for use. Inflated to correct pressure. No damage to sidewalls	Rams and hoses inspected no damage.

Guards Inspection	Fire Extinguisher Inspection
Guards in place as per manufacturers requirements. No action required	Extinguisher present and in date
Guards in place as per manufacturers requirements. No action required	Extinguisher present and in date
Guards in place as per manufacturers requirements. No action required	Extinguisher present and in date
Guards in place as per manufacturers requirements. No action required	Extinguisher present and in date
Guards in place as per manufacturers requirements. No action required	Extinguisher present and in date

Exhaust Servicing	Steering / Directional Control servicing
Exhaust working. No issues suitable for use.	Steering/Directional control working. No issues suitable for use.
Exhaust working. No issues suitable for use.	Steering/Directional control working. No issues suitable for use.
Exhaust working. No issues suitable for use.	Steering/Directional control working. No issues suitable for use.
Exhaust working. No issues suitable for use.	Steering/Directional control working. No issues suitable for use.
Exhaust working. No issues suitable for use.	Steering/Directional control working. No issues suitable for use.

Grease Points Checked	Bushes and Pins at Grease points check
All grease points checked and working. No grease required	All bushes and pins checked. No movement evident
All grease points checked and working. No grease required	All bushes and pins checked. No movement evident
All grease points checked and working. No grease required	All bushes and pins checked. No movement evident
All grease points checked and working. No grease required	All bushes and pins checked. No movement evident
All grease points checked and working. No grease required	All bushes and pins checked. No movement evident

External Electrical checks
All lights, indicators, reflectors and installed and working in accordance with legislative requirements and manufacturers recommendations.
All lights, indicators, reflectors and installed and working in accordance with legislative requirements and manufacturers recommendations.
All lights, indicators, reflectors and installed and working in accordance with legislative requirements and manufacturers recommendations.
All lights, indicators, reflectors and installed and working in accordance with legislative requirements and manufacturers recommendations.
All lights, indicators, reflectors and installed and working in accordance with legislative requirements and manufacturers recommendations.

Air cleaner service check	Batteries service check
Air cleaner checked and suitable for use	Battery checked and suitable for continuing use.
Air cleaner checked and suitable for use	Battery checked and suitable for continuing use.
Air cleaner checked and suitable for use	Battery checked and suitable for continuing use.
Air cleaner checked and suitable for use	Battery checked and suitable for continuing use.
Air cleaner checked and suitable for use	Battery checked and suitable for continuing use.
