SCOPE OF CERTIFICATION

This vehicle has been modified by fitting a TMC HLM retractable lazy axle behind the drive axles converting the rear axle assembly to a tri-axle configuration. The lazy axle is fitted with 30/24 brake actuators and an additional air tank has been provided.. The front suspension has been converted to load sharing using standard Freightliner components.

This modification results in a mean wheelbase of 7880mm.

This certificate covers only the modifications specifically described above. Any modifications carried out to this vehicle after the date of the inspection (12/03/08) are not covered by this certificate and may invalidate registration. Additional modifications will require further inspection and certification.
