Disclaimer Details

"Except as provided herein, Index NDT Inspections Ltd. Makes no warranty, express or implied with respect to the mechanical or other conditions of the equipment inspected by us. Index NDT Inspections Ltd. shall only be responsible in the event of damage resulting directly from their inspection, and in no event, shall the liability of Index NDT Inspections Ltd. exceed the cost of inspection." Our organization assumes only the responsibility of locating defects in the inspected components and welds made accessible at the time of inspection. All equipment should be cleaned to allow access to all welds and critical components. It is of the utmost importance that the unit's owner be aware that excessive coating over 10 mils can severely mask the detection of discontinuities while utilizing standard inspection techniques. We are not responsible for the mechanical or other conditions assembled condition except at customer's request.

Weld Repairs

For weld repairs of equipment, one of the two items must be followed:

1. Follow the written authorized practice from the manufacturer using manufacturer's components, and a qualified journeyman or CWB approved welding operator.
2. Follow the written practice as approved by our Engineer. This includes materials, consumables, and welding procedures.

All repairs completed must be inspected annually.

PHONE: 780.870.1547 EMAIL: operations@indexndt.ca Head Office Mail: P.O. Box 10524, Lloydminster, AB T9V 3A6

Engineering Verification

It is normally requested that an Engineer review the results of the inspection reports, repairs, and verify the completion of repairs. We are not responsible for the capacity, weld repairs, or alterations not specifically recommended by our Professional Engineer, and successfully completed under our direct supervision.

Load Testing

Load testing may be requested by our Technical or Engineering staff to verify the structural integrity, or following any major repairs to the unit. The items being load tested remain under the care and control of the owner during the test.

Engineering Certification

Where repairs or alterations are made to load carrying components and Engineering Certification of suitability for continued service is required, our Engineer must approve of the repair or alteration prior to the commencement of any work. Our Engineer may not be present during inspections but simply review all documentation and results of our field reports to issue Engineering Certification.

GOVERNING SPECIFICATIONS

W-59	-Welded Steel Construction

CERTIFICATE OF COMPLIANCE

CLIENT: L & L Oilfield
UNIT: 11
EQUIPMENT: Articulating Boom Crane
MANUFACTURER: Fassi
MODEL: F80AF.24
RATING: 7,826 lbs. @ 6'7"
SERIAL #: 0803-8163
REPORT ID#: IDX-6908
LOCATION: Lloydminster, AB
INSPECTION DATE: February 19, 2025
RECERTIFICATION DATE: February 19, 2026

CONDITIONS OF USE:

1. Identification and rating to be permanently affixed in a visible location
2. Visually inspect equipment prior to each use
3. Maintain equipment in good condition

CERTIFICATION:

Index NDT Inspections Limited performed a VISUAL AND MAGNETIC PARTICLE inspection on the above-mentioned MOBILE CRANE. All observations have been recorded and are disclosed in the Index NDT Inspections Ltd. report for the MOBILE CRANE with the serial #0803-8163. The scope of this certificate is limited to the inspection of item's structural condition at the time of inspection and does not imply a review of the equipment's design or it's associated capacity rating. The capacity noted above reflects the original equipment manufacturer's maximum capacity rating and may be reduced by operating conditions, regulatory requirements and the use of auxiliary equipment that has a lower capacity rating.

The undersigned Engineer reviewed all the inspection reports and has issued this certificate after all repairs (if any) were completed. In the undersigned engineer's opinion, the MOBILE CRANE #0803-8163 may be returned to service and operated within the original manufacturer's specifications. The equipment owner must provide the OEM's operating instructions with the equipment and maintain the OEM's identification and capacity markings. If OEM cannot be obtained, certified replacements must be obtained.

VALIDATION:

This certification covers the above-mentioned unit for a period of 1 year from the "inspection date" listed above, or until the unit is damaged by handling, transportation or operation, at which time non-destructive testing of the welds must be performed, as per CSA Z150 series of codes.
