EQUIPMENT INSPECTION REPORT

Client:	Newforce Energy Services	Date:	September 3, 2025
Equipment :	Picker Truck	Attachment:	
Unit:	PT-25	Make:	
Make:	Palfinger	Model:	
Model:	PK 23002	S/N:	
S/N:	100140757	Insp Code:	OHSA & CSA Z150-20 & W59-2018
Location:	Drayton Valley, AB		

MAGNETIZATION

Method: Yoke S.N: MP5791
Current: Alternating (AC)
Field: Continuous

PARTICLE

Medium: Magnaflux
Type: Grey Powder
Application: Bottle Puffer

PROCEDURE

Technique: MT-EY1
Surface Cond.: In Service
Demagnification: ASME V Art.7
Post Cleaning: Ardrox Cleaner

Visual & Magnetic particle Inspection to ASTM E709 were performed on the above described equipment with the following results.

A full-length inspection was conducted on the picker and outriggers. No Indications were found at the time of final inspection.

☐ Repairs Required

☐ Repairs Complete

☒ Sticker Applied.
