over parts to new transmission. Change out the transmission cooler lines, and replace coolant hoses to the cooler.

4/30- Worked to set transmission, hook up pump and put transmission mounts on and bellhousing bolts in, and hooked up hydraulic lines.

5/01- Installed Hydraulic tank and Hook up all lines set cab and bolt down.

5/3- The cab was securely fastened, and the hydraulic tank, transmission, and coolant were connected. Subsequently, the electrical components were installed, the brake pedal was put in place, and the necessary sheet metal was assembled.

5/6- Worked to fill up fluids and put all body panels back on machine.

5/7- Installed drive lines and put on fender, then put cab back together and fixed air leaks, jumped machine as batteries are no good and put thru calibration.

5/9- Replaced batteries and pulled machine outside, put machine through regen. Machine is good.
