

Ritchie Bros Customers and Fellow Buyers / Sellers,

I am writing this note to give a brief introduction of Watkins Construction and our background.

We have been involved in the pipeline business since 1957. We employ approximately 800 personnel and have locations in Texas, Oklahoma, and New Mexico. Our mission is to treat people right, take care of our customers, and get jobs done in the safest, most efficient way possible.

**Watkins Construction Company Fleet Realignment:**

My fleet is composed of late-model Cat Equipment that has been operated, serviced and maintained by in-house trained professionals. We take pride in the extreme care given to this machinery throughout its service life and as it is prepared to sell.

My team has examined each auction piece to the best of their ability in an attempt to ensure it is in the utmost condition, both mechanically and in appearance. Our goal is to provide equipment that is ready to go to your job site.

Quality is our top priority - there is nothing I would put my name on that has a major problem that I am aware of. I believe this machinery truly reflects those standards.

In closing, I want to commend Ritchie Bros Auctioneers on their ability to reach a worldwide audience and to sell equipment for top dollar. Emphasis on customer service and conducting business the right way has always been what Ritchie Bros stands for and that's why I chose them to sell my equipment.

A handwritten signature in black ink, appearing to read 'J. Watkins', is located in the bottom right corner of the document.
