64863	Accumulator gas pressure faults.	Closed, Completed	Corrective	Jan 16, 2023 09:17:41 AM		Jan 16, 2023 04:55:04 PM		
Task Description	Asset	Assigned To	Completed By	Date Completed	Est Hours	Spent Hours		
Accumulator gas pressure test over due was the code. Went through sis and did the steps to pump off the brakes. Kicked in the test. Test failed because of low brake accumulators. Charged both accumulators under the box. The Schrader valve on one of the accumulators was leaking so that valve was replaced and accumulator was recharged. Retried the test. Stilled fail. Removed the right side panel. Grab a new Accumulator from the warehouse and charged at the shop removed accumulator from unit and installed new accumulator. Retested. Test was successful. Reinstalled side shield	Articulated Rock Truck	Thomas Ragan	Thomas Ragan	Jan 16, 2023 04:55:04 PM	6.50

74079	ARD fan speed low shut down safely.	Closed, Completed	Corrective	Jun 28, 2023 10:19:56 AM		Jun 29, 2023 10:13:43 AM	
Task Description		Asset	Assigned To	Completed By	Date Completed	Est Hours	Spent Hours
Located machine on Bauer pad. Fan appeared to be jerky and bearings felt a little lumpy. Replaced fan with new, unit comes complete with the speed sensor integral. Attempt to run an aftertreatment functional test. Failed as DPf was at 90% soot loading. Run a forced DPf regeneration. Run two aftertreatment functional tests successfully. Upon getting ready to leave, ARD fan speed low code reappeared. Shut unit down and began checking wires. Unpeeled tape on FLHS of hood where harness bends. Nothing obvious. Began pinning out wires. Found no continuity on the signal wire for the speed sensor (white wire, pin B) and the pin 1 of J1 plug of the engine ECM. Would suggest pinning out the other wire for speed sensor, and then running a temporary overlander to see if this cures the issue. PRHP laptop and CA3 adapter left in cab. All plugs and wires reinstalled so unit is movable if required.		Articulated Rock Truck	Silas Angell - Wajax	Silas Angell - Wajax	Jun 29, 2023 10:13:43 AM		7.00
29 June 2023 - Silas A - Check continuity of pin A of plug to pin 1 of J1 of engine ECM. Found good (0.9 ohms). Check again pin B of plug to pin 31 of J1 plug at ECM. Continuity but high resistance. Inspected harness as much as I feasibly could. Found a previous repair that appeared to be good. Harness runs through hood assembly so not easily accessible. Run an overlander wire as closely tied to the harness as I could. Run an ARD ignition test, no faults. Run an aftertreatment functional test, no faults. Machine does also have a secondary speed sensor fault. Using ET the ECM is seeing a good RPM signal from sensor. Checked resistance of sensor, found within range (1,100 ohms). No further troubleshooting as called to another job.		Articulated Rock Truck	Silas Angell - Wajax	Silas Angell - Wajax	Jun 29, 2023 12:30:00 PM		4.00

Task Description	Asset	Assigned To	Completed By	Date Completed	Est Hours	Spent Hours
Burn down and brought to shop 27 July 2023-Diego Z -removed emissions package -found multiple leaks, marked with red tape -pulled right starter, both needed to be resealed, pump o-ring on timing cover, hose on transmission July 28/23 Kristian Z /DS	Articulated Rock Truck	Nick Misener	Diego Zamora	Jul 28, 2023 05:18:00 AM	2.83	9.00
-Removed the Aftertreatment module -Removed the Combustion exhaust -Removed the OPF -Started to create a parts list, but been pulled to another job working on 13-85-504R swapping GPS with Nick Wik July 29/23 Kristian Z /DS	Articulated Rock Truck	Kristian Zimmer	Kristian Zimmer	Jul 28, 2023 05:17:00 PM		11.50
-Resealed pass side starter with new o rings and gasket. Placed starter back on the pass side and Tighten bolts with loctite and placed gasket maker to get a good seal -Removed drivers side starter and washed it -Replacing O rings and rubber balls Note: -Cone housing needs to be bolted on -The rest of the starter needs to be installed. Old gasket is still sitting on the starter mount on the engine. Needs to be removed and cleaned. -Few more areas marked with red tape that need to be resealed -Mount starter and the rest of the emissions exhaust assembly 29 July 2023-Diego Z -re-sealed and installed left starter -started re-assembling emissions package July 30/23 Kristian Z /DS	Articulated Rock Truck	Kristian Zimmer	Kristian Zimmer	Jul 29, 2023 05:23:00 PM		6.00
-Assembling the Emissions Exhaust module, with new inlet and outlet Nox sensors and Aftertreatment burner spark module -Attached the module on the unit. -Clamped on the bottom exhaust and top exhaust -Assembled the rest of the wiring and tubing on the unit Note: -Where the red tapes are indication for leaks, must repair them -Install Side panel and bottom belly pan -Check all fluids, grease and lights -Do a Test run and a burn on the unit	Articulated Rock Truck	Diego Zamora	Diego Zamora	Jul 30, 2023 05:17:00 AM		5.00
30 July 2023o Z-Diego Z -washed unit -performed ash service and dpf regen -got soot level down to 1 percent -spent hours diagnosing engine oil leaks, and conclude timing cover leaking, which means oil pan , front main will also be resealed -gave parts number to supervision -cleaned up July 31/23 Kristian Z /DS	Articulated Rock Truck	Kristian Zimmer	Kristian Zimmer	Jul 31, 2023 02:26:00 AM		8.00
-Assembled the rest of the panels back on -Checked all fluids, lights and A/C. All are working -Rear wiper wasn't working due to a blown fuse. Changed the fuse with a new one	Articulated Rock Truck	Kristian Zimmer	Kristian Zimmer	Jul 31, 2023 12:04:00 PM		3.00

	Sept 05/23 Kristian Z /DS	Articulated Rock Truck	Christopher Paul	Kristian Zimmer	Sep 05, 2023 05:19:00 PM		5.50	
	-Removed leaking hydraulic hose							
	-The pipe that the transmission hose is rubbing on is rubbed threw and needs to be removed to get the welders to patch the hole up (438-5874)							
	-New hose made up and is sitting in front of the unit							
	Sept 6/23 Kristian Z /DS	Articulated Rock Truck	Kristian Zimmer				3.50	
	-Placed on mount clap for the hoses and zip tied some, so they aren't touching the other parts							
	-Topped up transmission oil							
	-Ran the unit to check if any leaks are present. No leaks present							
	-Bolted back on the bottom plates and pinned the cab back on the unit.							
	-Bolted on rear pin cover and rear left panel							
	-Drove unit to down line, cause its waiting for a right side strut							
	Sept 14/23 Kristian Z /DS	Articulated Rock Truck	Kristian Zimmer	Kristian Zimmer	Sep 14, 2023 05:18:00 PM		11.50	

-Removed old strut and cleaned off all the grease and dirt
 -Placed on new strut with one new pin and a good used pin
 -Lowered unit and filled the strut with oil
 -Bolted on hose guard on Final

NOTE: Ordered overhaul and brake service kits, cause the right front final is starting to seep out a bit of oil. Still good to drive for now. A Crossover is on unit Sept 18/23- Kal tire

OCT 03, 2023-MARVIN C-CHECKED OUT THE MACHINE. IT WAS CONFIRMED FRONT SUSPENSION FRAME MOVING BY ABOUT 1/4 INCH. WASHED THE WORK AREA AND BROUGHT MACHINE INSIDE THE SHOP. REMOVED A-FRAME BOTTOM BEARING CAP. VERIFIED PLAY BY USING FLOOR JACK AND IT WAS CONFIRMED BEARING WAS LOOSE. DISCONNECTED FRONT DRIVE SHAFT AND LOWERED THE A-FRAME USING PRESS, TOOK THE BEARING OUT, WASHED AND REMOVED SLEEVE FOR REUSE. WASHED ALL PARTS REMOVED AFTER. LOOK FOR NEW BEARING INSIDE AND OUT THE SHOP BUT NOTHING FOUND. D/S TO CONTINUE.		Articulated Rock Truck	Marvin Corpuz	Marvin Corpuz	Oct 03, 2023 01:15:00 AM		5.50
Oct 4/23 Kristian Z /NS		Articulated Rock Truck	Kristian Zimmer	Kristian Zimmer	Oct 05, 2023 04:44:00 AM		5.00
-Installed new centre pin bearing and sleeve with anti seize -Bolted main hold down washer and tighten the three bolts to 118 ft lbs and hit the washer till it will no longer move -Bolted on the bottom grease cover -Greased the bottom bearing and the rest of the fittings -Did a FillCal twice on the unit. Was a success -Marvin moved unit to the upline IMPORTANT NOTE: When machine comes back with another centre bottom bushing replacement, the front A Frame needs to be removed and machined. The bearing slipped in easily.
