CORRECTION:

CORRECTION:
Brought unit into shop. started to diag its no start issue,
truck all the sudden stopped cranking over.

Diag and try to locate the problem. The start relay works when jumped but it is missing the ground to activate the relay. Looked up the wiring diagrams, traced the wiring to starter shutdown and then to ecm .

Ecm is not supplying the ground, ordered new ecm after sending it out to be checked.

Brought truck back into shop, took it apart to get at the ecm.

After struggling got it out and found one plug that was missing the locking tabs, had to look up the plug and order from Diamond truck center.

Installed the new ecm after removing the doghouse to gain access. THE ONLY PART NUMBER: 70

Installed the wires in the plug, can't get wires to lock into the plug.

After many failed attempts to get them in, it finally worked
unit will crank now but ecm is still not online.

Opened up the wiring and traced wires after several hours i

found damaged wires. Repaired and close up the harness again checked and the ecm is online. Unit cranks but will not start.

Added oil the truck to see if it needed priming.. Still no start. Removed the feed line to the compressor and cranked but no oil. Drained oil from the pan and remove the pan. The suctions tube had one loose bolt.

Remove the fan belt Pulled the harmonic Balancer to gain access to the oil pump. Found the pump had one broken bolt and two loose ones on both sides. Removed the pump and checked for damage.

Ordered new seal and bolts for pump as well as front and rear

crank seals. Drained oil from trans and remove starter to undo torque converter bolts. Pull out trans and flex plate. Remove the rear seal.

Installed the new seal. and reassembled the trans to the engine. Installed the oil pump and 3 bolts stripped out. Order new bolts and installed Healey coils. Assemble again and 3 other holes stripped, removed again and repaired 3 move

holes. installed and this time they all torqued up. had to repair one stripped out bolt on the oil pan. Filled with oil and installed a new filter. installed belt and tested . engine cranked and then started. belt came apart. Order new belt and install. Test drove unit and its all good
