DESCRIPTION OF WORK - Lat. - 5psi Check for external leaks - none. Remove right fuel tank + remove oil pump - coolant in oil pump drive cavity under water pump. Remove water pump - tiny weep hole is plugged with dirt - poke with small ring pick - coolant came out. Remove center valve cover - definitely coolant in oil. Remove intake manifold + exhaust manifold - rust in intake ports. Phone + discuss findings with Ron. Remove head as per his instructions + took head to D. C. R. for magnafluxing + checking pressurizing - good. Reinstall head, etc. Install Cat + OR water pump with multiple changes. Install rad piping with new silicone hose + changes.

I / We hereby certify that the above work was completed to our satisfaction.

Warranty covered under this contract is for labour only - 1200 hrs or 6 months, whichever occurs first.

DESCRIPTION OF WORK Flush engine oil 2 times with
a mixture of Dowsol + 15/40 oil
+ then install customer supplied engine oil + filter. Muffler
was repaired by Sheffield. Replace upper + lower side
strips - most set screws were seized - had to cut off some of them + weld
nut on to remove - tap out set screw threads + install all new set screws +
scupper hole. Install drawbar shoes with all new bolts + washers +
set circle.

I / We hereby certify that the above work was completed to our satisfaction.
