Problem Description: Replace clutch and air leak repair

06/14/2024 - Read over Kenworths repair story Electrical side of things for the secondary air tank gauge should be good as everything was updated. Went under unit and inspected the air system found a few airleaks.
06/15/2024 - Repair multiple air leaks, look out for parts for the unit, repair damage winch cable, replace headlight bulb, unsized fifthwheel sliding locks. Shawn DG
06/15/2024 - Cleaned all the old jb weld on the air tank and prepped surface to have jb weld replied, Installed the jb weld and let it set. Checked over air system again. Clayton Q
06/17/2024 - Cleaned out the hydraulic assist housing and found broken clutch springs. Was instructed to get parts coming and to start removing the transmission. Got the unit set up on the columns and removed the transmission.
06/18/2024 - Cut off damaged tank, weld on new tank, fabricate mounting bracket. Nick G.
06/18/2024 - Remove batteries, unhook airline and remove tank for nick to weld and modify, assist clayton with repairs. Shawn DG
06/18/2024 -Fixed a few broken wires in the frame rail One was for the emergency shut off. Finished replacing the input shaft on the transmission Torqued all bolts to manufacture spec 50 ft lbs with blue loc tite. Cleaned the crankShaft surface where the flywheel sits, Installed the new flywheel followed cummins procedure and torque specs. Installed the clutch onto the flywheel torqued the bolts to manufacture torqued spec 50 ft lbs. I was not aware that the clutch was released as you had to remove four bolts from the clutch to get it to Clamp, this would be the issue we had when me and shawn tried to stab the tranmission in but we could not get it in the last inch. Used the input shaft from the clutch jack and reinstalled the clutch, removed the four bolts. The transmission was now able to get set in the pilot bearing. Installed all the bell housing bolts and torqued them to spec 50 ft lbs with blue loc tite. Installed the cooler lines, and ziped all wiring up. had to clean up the threads for the release bearing grease line as they were mashed. Clayton Q
06/19/2024 - Install the drive line torque the sytrap bolts to manufacture spec 125 ft lbs and use blue loc tite on the bolts. install the hydraulic pump. set the shift tower in place after zip tying everything up on top of the transmission. Performed eatons procedure for setting the automatic adjust clutch made 5 clutch applications to set it. Unit was taken for a road test, no issues found on the road test. Had to go out to the unit as when they moved the fifth wheel plate they ripped the 7 wire and service air line off. Repaired gthe service airline and cut back the 7 wire to a couple inches of where it was damaged. Installed new 7 wire plug and unit was sent on its way.Cleaned the bay the truck was in and washed the floor as there was alot of clutch dust from the unit Clayton Q
06/19/2024 - finished up air tank installation put back batteries and clean terminals , assist clayton on repair, assist on winch cable installation. Shawn DG
06/19/2024 - Road test truck to test new clutch, tested ok. Brent H.
06/19/2024 - Help remove old winch cable, and help install new winch cable. Brent H.
