Repair

Repair Description  Tighten tracks, RH step on c-frame has broken off track contacted it from c-frame wear. Install top con module. Foreman set unit up. Unit not seeing body position sensor, was told it was under cab dropped belly pan found sensor light wasn't blinking on it. Swapped blade with body sensor. Body sensor bad, harness good. stole sensor off HLD850-02. installed on 750 sensor lit up tried to go into top con computer and assign module didn't see sensor. Phoned dayna again looked into it more and sensor is located behind LH battery compartment door. Sensor is lit up. Went threw and recorded all sensor serial numbers for blade, c-frame, body. Assigned sensors to their position in machine configuration screen lit up green and can see machine on virtual job file now. On foreman to shoot corner bits and test unit. Joystick controls not working and unit is out. Need to research unit more.

Repair Description

 Drive to unit, remove rear window cage
Cut off broken bullet hinge from machine and from cage
Weld new hinge halves on both sides
Install cage onto machine and adjust latch.
Take apart gps connections, find internia sensor on front of blade won't light up green.
Check all connections going back and all ok, have to get gps tech out to replace
Later in day, head back out to unit to replace broken pin for angle cylinder
Have to hammer pin up and torch out as much as possible, hammer back down, torch off another chunk, and pound out pin.
Install new pin with keeper

Repair Description

 Coolant leak, drain coolant, removed EGR steel coolant pipe. O-ring cracked, matched with o-ring that was close. Refill coolant.
Install emissions module, fire unit up check for exhaust leak. Exhaust leak from emissions module, fix leak check for leaks again. Let unit run for 10 min, white some cleared up no smoke now once unit was warm.
Install hood, engine side pannels front ROPS. Remove blade pitch link, rebushing link, reinstalled.
Noticed blade tilt cyl rod eye bushing blown. Bushings ball completely out of Bushing. Parts ordered for HLD850-02 will fit unit. Remove blade tilt cyl, cylinder rod eye damaged clean up with die grinder, install new bushing. Cylinders barrel eye bushing worn grease solidified, clean out bushing get it taking grease. Flip bushing so it wear in a different spot, removed most of play from bushing. Mounting surface for cyl bushings damaged cleaned up with grinder.
Reinstalled blade tilt cyl. Greased unit and moved blade around trying to get grease threw bushings. Low bed took unit. While unit was on trailer quickly looked at window cages rattling,

rear window cage needs adjustment, LH cage upper hinge broken. Unit not inspected from winter season and top con antenna's not installed.

Repair Description

 Drove out to unit. Lifted unit in the air and checked all roller bolt holes. Found two broken bolts in the holes. Attempted to extract broken bolts but couldn't get them out because the roller mangled the track frame too much. Drilled bolt holes right out to re tap the hole and make new threads but ran out of time and needed to order a new tap to do the job.

REPAIR LEAK AT RIGHT SIDE PIVOT SHAFT

COMPLAINT:

COMPLAINT ON LEAK AT RHS PIVOT SHAFT

CAUSE:

WEAK MATERIAL - PREMATURELY WORN SEAL

CORRECTION:

DURING MACHINE CARE INSPECTION FOUND

PIVOT SHAFT LEAKING FROM SEAL.

"Lifted unit up with loader and blocked

in the air. Removed tracks from track

frame. Removed pins from equalizer bar,

removing pins from equalizer was very

difficult. Removed rear guards from

inside of track frames."

"Removed 2 sections of gear teeth &

locks on track frames. Used fork lift

to remove track frames & set on blocks.

Inspected & cleaned sealing surfaces.

Installed new backing plate & seal on

shafts."

"Cleaned & prepped sealing surfaces for

track frame installation."

"Lift track frame & installed onto

unit. Installed locks, final drive

gears & equalizer beam pins & set on

"Installed tracks on unit & tightened,
