Recall Description

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2015–2016 model year Chevrolet Silverado and GMC Sierra vehicles. In these vehicles, the roof-rail airbag (“RRAB”) inflators, which are located on the left- and right-side roof rails above the headliner, may contain a manufacturing defect that may result in inflator end cap separation or inflator sidewall split. If the end cap separates from the RRAB inflator or a sidewall rupture occurs, the compressed gas will escape from the inflator and the end cap or other components can be propelled into the vehicle, potentially causing an occupant injury if the vehicle is occupied.

Remedy

Dealers are to replace left and right front and rear row seat RRAB modules.
