Notes: <p>Did a rear axle/final drive swap with Their tractor was 7810 10,000 hrs maybe kinda unknown! They wanted our short axles. We wanted their extra long axles with dual hubs. and I did all the work in his shop. He's ex JD mechanic outta Melfort. Had all service manuals, know how ETC! Checked axle deflection. His both bad mine gud. .003". Our tractor got new axle bearings. Kit # RE12539. New bearings deflection .000" We swapped entire axle housing/final drive. All gears stayed with same axle housing. We swapped left to right so forward motion is wearing on other side now. Inspected brakes, all good. All assembly went as it should I was very happy with final product!</p>
