CHECK RIDE HEIGHT VALVES

Removed the ride height control valve rod from the mounting pin on the axle.
 Moved the rod up and down and measured the movement between where it would raise and lower the airbag pressure.
 Found 3-4mm movement at the valve.
 Found the rubber end piece to be worn and needing replacement.
 Ordered a new height control valve from parts department.
 Removed old unit from the trailer, swapped all fittings from the old unit onto the new one.
 Adjusted the rods to the same lengths as the old unit.
 Installed the new unit into the trailer and re-connected the airlines.
 Applied air to the trailer and tested for air leaks, all ok.
