REPLACE DEF HEADER

COMPLAINT:

codes ECU 003517.12 and ECU 003516.07 causing ECU 005246.31 making the sprayer not usable for in field spraying

Diagnostics:

def header (part# here) had failed causing codes ECU 003517.12 def level sensor fault and ECU 003516.07 def concentration sensor fault which in turn caused multiple derates including ECU 005246.31 engine idle only and stop machine derate

Repair:

got to the shop and found the parts we needed then went out to the sprayer location (30 minutes) once we were at the sprayer I turned the battery kill switch then disconnected the electrical to the def header undid the clamps on all the lines, removed the def lines and then the coolant lines and clamped them so they would not leak then removed the three bolted and removed the def header and cleaned out off the dirt where the new one had to fit in and seal installed the new header in reverse order and made sure all the clamps were tight and installed properly turned battery kill switch back on and connected the EDL and laptop to the unit, performed a def header coolant purge test to get the air out of the new header then

performed a def system test to confirm everything was functioning properly
then performed a clear latched aftertreatment dtc test and cleared all the codes and refreshed all the codes to make sure nothing would come back
ran unit for a couple minutes and no codes came back (2 hours)
packed truck back and drove back to the shop to unload and deal with parts and write the story (30 minutes)
